

**Algebra and Model Theory 11. – Novosibirsk: Edition of NSTU, 2017. – 188 pp.**

**Contents**

**Introduction ... 3**

**School Program ... 4**

**75th anniversary of Professor V. M.Kopytov (Russian) ... 9**

**75th anniversary of Professor V. M.Kopytov (English) ... 13**

**70th anniversary of Professor A. G. Pinus (Russian) ... 17**

**70th anniversary of Professor A. G. Pinus (English) ... 20**

**S. G. Afanasyeva, Algebraic sets in divisible 2-rigid group ... 22**

**K. Ahmadidelir, Non-associating graph of a finite Moufang loop and its relationship with the non-commuting graph ... 28**

**S.S. Baizhanov, B. Sh. Kulpeshov, On expansions of models of 1-indiscernible countably categorical weakly o-minimal theories ... 50**

**O. V. Bryukhanov, On ascending HNN-extensions of polycyclic-by-finite groups ... 60**

**D. Y. Emelyanov, Algebras of binary isolating formulas for simplex theories ... 66**

**E. V. Grachev, A. M.Popova, Factorization problem of integral group rings of finite groups automorphisms ... 75**

**Y. Kiouvrekis, Agent-behavior system: An introduction to a topological approach ... 81**

**M. G. Peretyat'kin, First-order combinatorics and a definition to the concept of a model-theoretic property with demonstration of possible applications ... 86**

**N. A. Peryazev, I. K. Sharankhaev, Algebras of multioperations ... 102**

**A. G. Pinus, On restrictedly generated congruences and Skolem restricted extensions of theories ... 112**

**A. G. Pinus, Fragments of functional clones as a method of studying the latter ones ... 118**

**L. V. Ryabets, M. I. Goncharova, About E-precomplete Classes of Hyperfunctions on Three-Element Set ... 130**

**M. Shahryari, A new characterization of  $q_{\omega}$ -compact algebras ... 134**

**S. V. Sudoplatov, Classification of countable models of complete theories: popular and philosophical aspects ... 141**

**E. I. Timoshenko, On formulas on soluble and nilpotent groups ... 154**

**A. A. Vikent'ev, New model distances on logical sentences used expert interpretations formulas of many-valued Lukasiewicz's logic for collective clustering of formulas from the knowledge base ... 162**

**Abstracts ... 184**
